TOTAL DOCUMENT SOLUTIONS

## F550

HIGH VOLUME FAXING WITH THE  
POWER OF NETWORK FUNCTIONS

With double-sided printing, scan-to-email and colour scan capability, there's more to the F550 than meets the eye

If your business relies on managing daily high volumes of faxes, look no further than the Gestetner F550. It brings you powerful faxing and a host of superb features to enhance performance and productivity.

As a network standard fax, the F550 is a powerhouse of innovative functionality that is reliable and easy to use. It goes far beyond the expectations of an average fax device, delivering productive features such as Scan-to-Email, colour scanning, network print and double-sided output.

Together, this means that the F550 provides a total solution to your team's daily document needs from one reliable and cost effective source.

*Gestetner's unique approach, links people with knowledge and expertise, combining our wide experience of innovative document related Products and Software Solutions with our world class Business and Professional Services to deliver the best Total Document Solutions for your business.*

Scan-to-Email lets you send documents direct to any inbox. There is even an option to scan in colour

Security features ensure complete faxing confidentiality and guard against unauthorized use

600dpi resolution ensures crisp, clear output every time

#### **Fax across the network**

Avoid internal phone call charges with the F550's standard IP faxing feature, a vital cost saving in high volume fax environments. By simply entering IP addresses instead of fax numbers, users can communicate with other IP faxes over the network.

#### **Scan-to-Email as standard**

With the F550's productivity enhancing feature, Scan-to-Email, you can scan an image and send it direct to a selected recipient from the easy-to-use control panel. For even more convenience, the QWERTY keypad makes inputting email addresses quick and easy.

#### **Quality network printing**

With the network print option there is no need for separate single-function devices to take up space in your office. The F550 becomes a 15 page per minute network laser printer that produces clear, crisp 600dpi quality printing. This makes the F550 an ideal solution for all your daily document demands.

#### **Optional colour scanning**

Colour makes any document look more professional and impressive. With the colour option, you gain the benefit of network colour scanning and colour Scan-to-Email at the touch of a button.

#### **Print both sides and save paper**

With a standard Duplex Unit, the F550 outputs double-sided documents when faxing, copying and printing. This can instantly halve paper costs and along with an energy saver mode reduces impact on the environment.

#### **Ease-of-use**

No more difficulty remembering numbers, or making errors when dialling. All your frequently used numbers can be stored, and then quickly accessed through the easy-to-use control panel. With 90 Quick-Dial, 200 Speed-Dial and 9 Group-Dial features, faxing is faster and simpler than ever.

#### **Smooth, uninterrupted communications**

With the Gestetner F550 your fax communications are reliable and effortless. The standard 7MB memory means that up to 560 pages can be stored, ensuring each fax is smoothly processed without interruption. The device also features a 12 hour memory back-up, so even in the event of a power loss, faxes and settings are safely stored.

#### **Superb paper handling features**

The Gestetner F550 brings ease-of-use and fewer interruptions to your faxing and printing. A 70-sheet Automatic Document Feeder enables you to handle large multi-page faxes quickly and effortlessly. With the 1,250-sheet storage capacity paper replenishment is kept to a minimum. The 100-sheet Bypass Tray also allows you to conveniently print on a variety of paper types.

#### **Security and control**

The F550 provides some excellent security features. Once activated a PIN is required by users before received faxes can be printed out. The result is extra confidentiality, as private documents are not left lying in the fax output tray. In addition, the F550 can be set up for restricted use. In this case a PIN is needed to send a fax, allowing you to prevent unauthorized use and monitor usage.

#### **Software Solutions**

Complementing the F550, Gestetner offers a superb range of Software Solution products, specifically designed to integrate this device into your document communications environment. These Software Solutions are aimed at improving the way you manage documents and information in your organization. Combined with our expert consultancy, Business and Professional Services and support, they offer a tailor made solution to your office, improving efficiency, productivity and cost control.
